

Дилерский интерфейс Volvo VOCOM

Алматы, Казахстан

Дилерский интерфейс Volvo VOCOM для диагностики грузовых автомобилей и спецтехники Volvo, Volvo Penta, Mack и RENAULT TRUCKS. Отличие Volvo VoCom от предыдущих в том, что программирование ЭБУ грузовиков Volvo VERSION2 (с 2002 года и новее) происходит на высокой скорости, что экономит время диагносту. Volvo VoCom работает с Premium Tech Tool (PTT) - дилерским программным обеспечением, специально разработанным для тестирования, калибровки и программирования параметров двигателя. PTT поддерживает множество функций для современных грузовых автомобилей и спец техники - отслеживание параметров работы двигателя в реальном времени, калибровка датчиков, тестирование исполнительных механизмов, параметрирование, программирование, адаптации новых блоков и пр. Также, новая версия ПО Premium Tech Tool (PTT) включает в себя и технику Volvo Penta, для диагностики которой ранее требовалось отдельное, дорогостоящее оборудование. Некоторые модели, с которыми работает дилерский интерфейс Volvo VoCom Volvo Trucks: AC COMP04 F10 F12 F16 FE FH FH12 FH16 FH565 FL FL10 ai2 FL6 FL7 FM FM10 FM12 FM9 FM7 NH1.2 NH525 NH565 NL10 NL12 VAH Premium Tech Tool (PTT) - диагностическое программное обеспечение, разработанное для тестирования, калибровки и программирования параметров автомобиля. Многие функции в современных автомобилях управляются электронными блоками управления (ECUs). Основное назначение PTT состоит в том, чтобы сделать процесс диагностики и ремонта более легким

PTT Development mode дает вам больше прав для доступа, диагностики и программирования параметров.

Диагностический интерфейс Vocom 88890300, 8 pin кабель 88890306 USB кабель 88890305, OBD connector 88890304

Опционально:

Переходник 8pin to Penta, Переходник 8pin to OBD (Buses v2 - B12)

Переходник 8pin to EDC для грузовиков ранее 1995 года, Переходник 8pin to Renault, Переходник 8pin to 9pin для американских грузовиков, Переходник 8pin to 14pin для спецтехники Volvo, для ABS до 1994 г.
