XYX Series Wheel Hydraulic Core Drilling Rig 1

Алматы, Казахстан

1、Introduction of XYX Series Wheel Hydraulic Core Drilling Rig
XYX series wheeled hydraulic core drilling rig is designed to satisfy the change of short distance construction site in field exploration. On the basis of hydraulic drilling rig, removable walking mechanism and towing device are installed. According to the special requirements of customers, we can customize two-wheel or four-wheel towing style.
2、Features of XYX Series Wheel Hydraulic Core Drilling Rig
2.1 Walking mechanism and towing device make it more convenient to move in short distance.
2.2 The optional moving device can realize the front and back movement of the main machine and is convenient for wellhead operation.
2.3 The optional electrically started diesel engine can reduce the labor intensity of operators, especially in cold season.
2.4 It has an oil pressure feed mechanism to improve drilling efficiency.
2.5 Equipped with hole bottom pressure gauge, easy to master the situation in the hole.
