QTZ Series Portable Soil Sampling CDR

Алматы, Казахстан

1、Introduction to QTZ Series Soil Sampling Drilling Rig
QTZ series soil sampling drilling rig is a portable one-person soil sampling drilling rig, which is mainly suitable for environmental soil survey, soil structure description and so on. The drilling rig relies on the high-frequency impact force generated by itself to inject the soil extractor into the soil, and then extracts the soil extractor from the soil through the extractor.
2、Features Of QTZ Series Soil Sampling Drilling Rig
2.1 Strong impact force, stable performance.
2.2 Simple operation and high safety.
2.3 There are gasoline engine models, diesel engine models, electric motor models and hydraulic pump station models, providing more variety in choices.
2.4 The drilling rig is simple in structure, small in volume and light in weight, which is convenient for assembly, handling and disassembly.
