SH30-2A Engineering Survey CDR

Алматы, Казахстан

1、Introduction to SH30-2A Engineering Survey Drilling Rig
SH30-2A engineering survey drilling rig is mainly used in the geological survey of placer gold exploration, industrial buildings, civil buildings, roads and bridges. The drilling rig has two feeding modes, impact and rotary, and customers can equip it on demand. Drilling rigs can be machined and customized to crawler type.
2、Features of SH30-2A Engineering Survey Drilling Rig
2.1 Simple operation and high degree of mechanization, greatly get rid of heavy manual labor.
2.2 Light weight, compact structure, good disintegration performance, removable in mountainous areas.
2.3 Equipped with a pair of rubber wheels, in flat road can be used to achieve displacement by car towing.
